## Professional Summary: -

Experienced and motivated information technology professional with a Java development background and knowledge of web systems. I'm currently holding two internships where I am working on Java application development as well as front-end web development for an e-commerce platform. During my Final year, I was responsible for the creation of five dynamic web projects which included a creative CS Department Website and many managements system. I have also managed to complete four extensive projects in under a month which shows my ability to deliver quickly. Currently passionate about learning Data Structures and Algorithms (DSA) using Java because it is something that keeps me knowledgeable all the time. In addition to this I have used Odoo.com for R&D website development plus another project is being conducted using MERN stack which will help me gain more skills in modern web technologies.

---

## Project's: -

- [GitHub](#)

- **CS Department Management System**

CS Department Management System is a web-based system that allows Teacher & Admin to View Student Activities and Up to date Website. It Basically made for show how other colleges department websites are worked. This is my Final Year Academic Project.

- **Online Bakery Shop**

Online Bakery Shop is a web-based system that allows customers to order bakery products online. A website would be developed for through which all customers can order products.

- **Online Cloth Shop**

The "Online Cloth Shop" project was designed for Shree Collection, Masur to provide a web based application developed in java/JSP to automate the selling process of cloth shop. It assists in maintaining master entries such as company info, product type info, product info, customer and dealer info, as well as it handles all sales related tasks such as sales billing etc.

---
